

2011 IFIP World CIO Forum

IFIP WCF-----Call for Paper

Nov 1-4

Shenzhen China

Nowadays, the economic globalization, capital globalization and globalization of crisis management are strongly underpinned by the application of information technology. IT is increasingly becoming a crucial stimulus for economic growth, innovation and transformation. As leaders of the IT sector, CIOs play an important role in realizing the value of IT. Sharing of knowledge and experiences of CIOs, and integrating the power of IT to spur national economic progress and formulate effective business strategy are among the primary objectives of the International Federation for Information Processing (IFIP).

With the afore-mentioned objectives in mind, IFIP has approved the proposal by the country representatives of China, India, Netherlands, Germany, America and South Africa etc to organize the World CIO Forum. As a global platform to discuss relevant IT related issues and topics in national policy formulation, business sustainability and environmental conservation, IFIP has authorized the Chinese Institute of Electronics to host the first World CIO Forum. The Forum will invite distinguished members of the government, business, IT and academic communities to present and share their knowledge and experiences to enrich the participants, expected to be more than 1000 attendees from across the globe.

Topics of interest include, but are not limited to:

- New Technology Brings about New Opportunity
- Sustainable Development and Green IT
- How does CIO Become the Business Enabler?
- Cloud Computing
- Process Optimization and Revolution
- Expansion of Supply Chain Value
- Next Information Technology
- Open Source Software
- Information Security, Compliance and Privacy Protection
- Wireless Communication
- Security and Cryptography
- E-Commerce and E-Government
- Data Mining
- Knowledge Management
- Risk Control
- Business Intelligence
